

A detailed view of a car's engine compartment. The central focus is a large, black, ribbed cylindrical component, likely a compressor or condenser, which is secured to the engine block with a metal hose clamp. A yellow dipstick is visible in the background. Various hoses, wires, and mechanical parts are scattered throughout the engine bay. Annotations in yellow text point to specific features: an additional hose clamp on the left, a standard hose clamp on the right, and a bolt on the bottom center. A 'Box' label points to a component on the right side of the engine.

**Additional hose clamp  
to loosen**

**Hose clamp as  
per videos**

**Additional bolt -  
careful not to lose**

**Box**
