

## OCTOBER NEWSLETTER

### 90 & 110 Roof Racks - Available 1st December 2009

The Limited Edition 90 & 110 Expedition roof racks are almost completed and are due to be delivered from our factory at the end of this month. These are amongst the strongest and toughest racks in the market, made completely of high grade powder coated steel and designed exclusively for the Defender. If you are interested in purchasing any of the above, please do not hesitate to get in contact as these will not be manufactured again in the future. We will be stocking the racks in our Newmarket depot for customers to come and collect or have fitted. There may be a provision to ship the racks within the UK & Europe - but this will be quoted for on an individual basis. For further information please contact Chris Platt on **01638 560524** or alternatively email [sales@safetydevices.com](mailto:sales@safetydevices.com) to reserve your rack with a £250 deposit. Available to purchase will be the rack in either 90 or 110 form, the flooring and the ladders, please see pricing shown.

**Expedition Roof Rack 90 & 110 - £850.00**  
**9mm Wood Flooring - £170.00**  
**Rear Access Ladder - £170.00**

**NEW: BMW E46 Full Weld In Cage**

### Roll cages to be sold on eBay - End of line stock

Safety Devices International has been producing a wide variety of roll cages over the past 35 years and we have managed to collect quite a few rare cages in our warehouse over this time. Many are one-offs where we are not able to produce anymore and others are for cars which are not quite so popular these days.

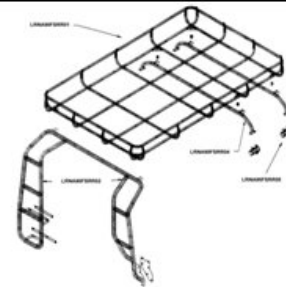

We are now looking to organise our warehouse and it has been decided that we will be clearing all of this stock by selling the cages on eBay in the very near future. There will be a mixture of full cages, front cages to finish off a rear section and some door bar combinations.

These cages must all be sold - so there may well be some great bargains to be had!

### NAS 90 Racks - Discontinued!

The Limited Edition manufacturing run of the original NAS 90 roof racks has now come to an end - never to be repeated again. This means that if you want one of these iconic racks, then this is your last chance. The racks are all in stock with our dealer, East Coast Rover, in the USA. You can take your Rover over to Maine to have the rack fitted, or there are possibilities of having the rack shipped if you require. For further information, please do not hesitate to contact the guys at East Coast Rover, please see their details on the right.

### Do you already have a Safety Devices Roll Cage? Have you had a rollover yet?

If so we are running a competition for the best crash photo featuring one of our cages. There will be a quarterly prize of SDI merchandise and at the end of the year the best photo will win a complete roll cage of the winners choice\*

Send your photos along with contact details and a description of your accident to:  
[newsletter@safetydevices.com](mailto:newsletter@safetydevices.com)

### July - August - September Winner!

Congratulations to **Will Mather** for winning this quarters roll cage competition! His Land Rover Defender 110 took a detour down the side of a mountain in Belize, but due to the superior protection offered by the Safety Devices roll cage installed, his girlfriend walked away with only a couple of scratches.

#### Great Result for 60th Birkett Team - The Six Potters

This years winners of the 60th Birkett 6hr relay race at Silverstone were The Six Potters, racing a combination of Jaguar XJ6, XJS, XJR and XJ40 models - all of which have been installed with Safety Devices roll cages supplied through [Classic Spares Ltd](#). They have become the first all-Jaguar team to win the event for more than 50 years - a tremendous achievement.

**Congratulations!**

#### Development Vehicles Required!

As part of keeping up to date with the latest Motorsport formulae, Safety Devices is always looking to expand its range of roll cages in both bolt in and weld in. If you have one of the vehicle listed here and are going to be need in of a cage - please get in touch as there are discounts available on the price of a regular bespoke installation! Details are also on our [website](#).
